Projects

John Given Wines, Inc. Android App – Programmer – Android

August 2016 – Present

- *Programs used:* Android Studio, GitHub, Google Play Developer Console
- Android app for John Given Wines, Inc. Displays upcoming tastings, new vintages, regions and wines in the portfolio, and information about the company. All content generated from easily edited JSON files.
- First step in comprehensive update to JG Wines online presence. Website update will use the same JSON files to generate content, making it easy to keep app and website up to date from one location.

DeIVR – Associate Producer

January 2016 – May 2016

- *Programs used:* JIRA (task and sprint tracking), Slack, Google Drive & Programs, Chrome/Firefox, Heroku, GitHub.
- Webapp that utilizes WebGL to allow desktop users to make dungeons in a 2D, table-top, pen and paper style, and then view them in 3D virtual reality using their mobile devices.
- Managed team of 13 students. 5 teams – Design, Art, Front End, Back End, and Core.
- Responsibilities: Plan, begin, monitor and report on week long sprints. Plan future milestones, and determine features required. Meet with team leads to identify requirements and potential road blocks. Hold meetings and take notes. QA developer branches to ensure function for task complete. QA to find bugs and report them. Provide sprint status updates to executives.
- Provide leadership and counsel to team members. Conflict resolution between team members. Held one on one meetings with members to determine satisfaction with project and position, moved as necessary.

HEXES!! – Party Card Game – Team Lead / Project Manager

September 2015 – Present

- A card game with hexes that have rules you must follow if you receive one, and defense cards to protect you from them. Submitted to Hasbro's game competition and selected as top 5 out of over 500 submissions.
- Team lead for coordination with Hasbro and Indiegogo points of contact, meeting and interview scheduling, and any other communication / management necessary.
- Successfully crowd funded on Indiegogo on Dec 1, 2015, raising over \$7000. HEXES!! to be published, manufactured, and distributed by Hasbro as licensed product, with worldwide distribution by 2017.

Fortnite – Production Intern

June 8, 2015 – August 21, 2015

- Developed and ran new internal playtest process, gathered and released feedback to the team.
- Ran daily art review meetings, and weekly animation review meetings. Notes taken and released, and reviewed material uploaded to database for team to see.
- Helped production team in sprint planning and management. Aided in management of JIRA bug database throughout sprint for triage. Managed confluence for internal Fortnite information.
